WOMEN'S INSTITUTES

PLAN NEW PROGRAM
On July 28, 24 ladies representing the 10 W.I.'s of District 5 met at the home of Mrs. George Long to draw up their new handicraft list. It was decided to have the tea and display earlier next year, preferably the middle of April.

Golf Notes . . .

Eleven ladies played in the ladies' competition last Thursday, when Mrs. D. McMullen was the winner. Any interested lady is invited to play in this week's honey-pot competition. A ladies' two-ball foursome is planned for the following week when partners will be arranged according to handicaps.

Fourteen Legion and Auxiliary members turned out for the golf tournament on Sunday, July 29. John Folkmann and Vivian Callhens were winners with low score.

Another Storm Tuesday; No Hail Damage Reported

Another thunder and lightning storm, which lasted several hours, raged over this area Tuesday evening but after numerous phone calls to various districts no hail damage was reported. This marks another in a series of storms which have passed over or around the area protected by hail suppressors.

Information at hand reveals that of the 340,000 acres within the target area, only one small part, a two-mile wide strip north of Carstairs, has suffered what could be called heavy damage. Loss in the area was estimated at from 5 to 30%.

Most districts to the west, south and north of the covered area have suffered damage up to 100% in many cases.

At present 42 suppressors are ready for action at any time it is deemed necessary by those in charge.

Calgary Team To Play Here

C.P.R. Beavers, a power-house in the Big Six Hockey League for the past several seasons, will play one league game a week in the local ice palace when the schedule starts this fall.

Club representatives met with the arena board Tuesday night and arrangements are now well under way. Reason given by local bosses was "We need the money to fix up the dressing rooms and to finance the installation of natural gas in the centre."

Plans for the local team have not been decided on as yet but there is little doubt the Ramblers will again be a team in an organized league come winter.

LIGHT YOUR WAY WITH BIBLE STUDY

"Yes, I quite agree with you that Jesus did much good while He was here on earth. The four Gospels clearly show us many of His good deeds. And in the Book of Acts we read: 'Who went about doing good, and healing all that were oppressed of the devil; for God was with Him.' But, that was long ago. How can Christianity help me today?"

How can Christianity help me today? Have you ever been assailed by this question? I dare say, you have. What did you do with it? Shrug it off, pass it by, or sincerely endeavor to answer it? How can Christianity help me today?

As we face the ever-increasing number of daily problems in our economic, social and private lives we need something that will give us stability when all else totters; we need something that will give us courage to lie down at night and arise on the morrow, refreshed to face another day; we need something to give us hope as we face the dismal abyss of failure around us on every side.

All of this, and much more, is offered us in the Lord Jesus Christ. Through faith in the Savior of the world we have that necessary power for today. Listen to some of these glorious words:

"All things are possible to him that believeth"; "Cast all your care upon Him for He careth for you"; "This is the confidence we have, that if we ask anything according to His will, He heareth us"; "With Him is plentiful redemption."

May we then also say with one of old time, faced with the problem of daily living, came to Jesus with that problem in the words: "Lord, I believe; help Thou mine unbelief."

Ramblin'

Strike One . . . May 20th, 1955, the following release was received here from the provincial government:

"The Minister of Highways, announced from his office today that it was the policy of the Provincial Government to build asphalt-topped approach roads from the network of main through highways to towns within easy access to the highways.

"Last year, when the construction of the divided four-lane highway between Bowden and Crossfield was approved, representations were made by the Town of Olds, Carstairs and Didsbury, and Mr. Fred Niddie, M.L.A., and Mr. Howard Hammell, M.L.A., for asphalt-topped connections. The matter was taken under advisement and policy has now been approved to provide such approach roads. This will also apply to the Towns of High River, and Nanton, if the new road is protected with. Heretofore, the approach roads were constructed, generally speaking, by the local authority on a 75-25 basis, the Province paying the 75%. The new policy will insure good approach roads to the various towns close to the main through highway network, and will provide ready access to all who want to do their business at these centres. Approach roads approved will be built by the Department of Highways."

Strike Two . . . Nobody on base, but the bases are loaded — with holes, big ones!

Strike Three . . . The following letter, received here last week gives you a quick answer:

"To the Town of Didsbury:

Mr. J. L. Owens, M.L.A., has been in touch with this office several times in connection with the matter of building an approach road from our highway to the limits of your town. As you are aware the Government of Alberta now has a policy of building such approach roads. This policy is being worked out in detail and it is our intention to ask the Legislature at the next Session to provide a Vote in the Estimates for this purpose. With the money provided we will then build the approach roads as rapidly as possible. There are many scores of these, however, throughout the Province and we will consequently endeavor to build them in the order of their importance.

"We had planned to construct the approach road from our highway to your town this year but in view of the above we are now planning to hold up same until the beginning of next season when this work will definitely be in our program.

"If your Council would like to discuss this matter I will be glad to meet you for that purpose.

"Thanking you for co-operating in this matter and with kindest personal regards, I remain,

Sincerely yours,
GORDON E. TAYLOR
Minister of Highways"

SPIDER MITES: Numerous reports have been coming to me regarding the presence of the spider mites attacking spruce trees in Shaverbelts. The first sign of them will be extensive white webbing among the twigs and branches of the trees in towards the tree trunk. If you will closely examine this webbing you will likely be able to detect many very small white eggs right in the webbing. This is where the eggs are laid and stay until they hatch. The full grown spider mite is about 1.20 inch long and reddish brown in color. They fasten their back into the spruce needles and stay here, sucking the juice out of the tree. Gradually the needles take on an off color and as time goes on become brown and then drop off. If left undisturbed, these spider mites can most certainly kill full grown spruce trees.

The longer treatment is delayed, the more serious damage will become. There are several generations a year so that several sprayings spaced about three weeks apart would be ideal to control or eradicate them. Malathion 50% liquid concentrate should be used as a spray, at the rate of 1 tablespoon per gallon of water or 1 pint per 100 gallons of water. A high pressure low volume applicator would be ideal. One that will penetrate and break up the webbing. Use every precaution to prevent the spray or the fumes from reaching yourself or any one else. Remember, you are using a poisonous material.

TOO MUCH
In a small town there lived a woman who had had 8 children in 11 years. The night the oldest one, Sally, tried on her confirmation dress, her mother said, Sally, honey, I think you're beautiful. The youngster's face lit up. Then her mother added, teasingly, "Of course, I'm prejudiced."
Sally's face fell. "Oh, mother," she whined, "not again!"

AD TO MUNICIPALITIES INCREASED \$20 MILLION

The provincial government has granted authority to invest an additional \$20,000,000 in the special investment fund, set up to provide money for municipal and school purposes.

The money will be used during the 1956-57 fiscal year.
At the beginning of this year, \$20,000,000 was invested in the fund, but this has since proved insufficient, spokesman said.

NO SMOKING
Rods installed in furnace ex-
haust stacks, incinerators and
other air polluters promise to
end the smog problem. Largely
composed of alumina, the oxide
of aluminum, the rods not only
ignite waste gases but release
heat that goes back to work in
the plant.

In everyday items like aircraft,
furniture and frying pans, and
in many an unseen job as well,
aluminum makes living more
pleasant for all of us. In fact,
Canadians have become the
world's fourth largest per capita
users of this modern metal. Our
aluminum industry not only
supplies this home market, but
is the largest exporter of alu-
minum for the Free World, too.

ZELLA NEWS NOTES

(From Our Own Correspondent)

Intended For Last Week)
Bobby and Leslie Waldroff are at-
tending camp meridian at Gull Lake
this week.

We are pleased to see Fred Jahnske
home again after his prolonged stay
in the Didsbury Hospital with yel-
low jaundice.

Mr. and Mrs. Mel Smith and fam-
ily, Mr. and Mrs. Nels Petersen and
family and Mr. and Mrs. A. Waldroff
were among those attending the
Raven Rish Hatchery picnic.

Eric Lawson of Denmark arrived
two weeks ago to visit at the home
of his uncle John Hansen.

A community picnic is being plan-
ned for Tuesday, August 16th with
dinner at 1 o'clock and an afternoon
of races and fun. A cordial invita-
tion is extended to all.

A vocational Bible school will be
conducted at Sundre, August 6 to the
11th in the morning only and a car
service will be available for those
wishing to attend.

BUT HURRY!

The young groom tasted the cake
his bride had baked and before he
could voice an opinion, she chirped:
"I took the recipe for that cake out
of my new cookbook."

"Fine," he spluttered. "And if there
are any more in there like it, take
them out, too!"

Here's what
Imperial
does with
its money

Of every dollar Imperial
Oil took in last year, more
than half went to buy
raw materials,
such as crude oil.

Operating and administrative
costs, depreciation, and
the wages of Imperial's
13,500 employees
took about a quarter.

Just over a tenth went
in taxes, not including
the road taxes in the
various provinces.

Just under nine cents went
Imperial's "profit," of
which five cents went
re-invested in the business.

So, of every dollar Imperial
took in last year, just
over four cents went in
dividends to the company's
45,000 shareholders.

"WHY PLUS HOW"

"More people are looking for
poisons than for jobs and more are
after jobs than work."

Thirty-six men paint continuously
on the Bay Bridge in the harbor at
San Francisco. They never finish.
When they complete the painting at
one end, they go back to the other
and begin all over again. Week
following week, month following
month, year in and year out, 36 men
are painting this bridge. This plan
of painting is to keep the bridge all
well painted all the time. The pur-
pose is to keep the steel protected
from the weather, so the steel will
not rust and the bridge decay and
millions of people work
on jobs of a similar nature more
than nine tenths of their lives.

You ask how can any person
work on such a job? Can a life so
spent have any real meaning? The
same sights, the same sounds, and
the same routine every day. Life has
no job, no not one, that is worthy
of man's time and energy that is
not routine. Every creative task is a
task crammed with sameness and
with what we call monotony. Yes,
these lives have meaning because
they embrace both a purpose and a
plan.

Life's purpose for each of us when
here is first, to develop the finer
qualities and genuine powers, locked
up within the self. And second, to
do so use these qualities and powers,
that others are helped to discover
and use their finest qualities and
powers. This is not that we should
please a supreme being only; worthy
as that is; but rather that man may
so live as to find living an experience
of unending satisfaction and useful-
ness.

This purpose continues unchanged
from generation to generation. This
is so, whether we follow one occupa-
tion or another; whether we live in
country, town or city; regardless of
what group or groups of people we
are associated with. Whatever our
work may be, and whatever it is to
be done, and within whatever cir-
cumstances are there, this purpose
can be, and must be ours. No one
need live with his finest qualities
and genuine powers, imprisoned in a
dwarfed self. Right where we are
now, these can be developed and used
to the complete satisfaction of self
and to the glory of the eternal God.

The purpose then is endless. The
bridge is to be preserved for the use
of future generations of people. The
painting is a means to an end. The
end is the upkeep of homes, the rear-
ing of children, the training of future
citizens and the maturing of all that
is best in all human relations, with-
in the world wide family of God's
children.

That job of yours, may seem like
life's dead end task, but it has been
entrusted to you. It is yours. You can
grow in it. It has been entrusted to
you by your family and friends;
by this generation and the need of
today; by the industries of the pre-
sent and future. Yes and by Him
who has provided you with strength
to carry on. Should you not feel
then, "I would be true for there are
those who trust me."

It was the writer's great privilege
to make an old fashioned cheese
box, every minute and a half, for ten
hours a day, six days each week. The
old factory was always filled with
steam, over clothes always damp.
The box hoops had to be lifted from
vats of boiling water. It was a mon-
otonous job only for a short time,
until the purpose to make each box
just a little better than the one
before, caught fire in the maker's
mind, and from then on box making
became a wonderful opportunity
through which life's finest qualities
and genuine values could be develop-
ed and enjoyed.

One other thought worthy of
everyone's careful consideration. This
job, tiresome as it may be, does make
it possible for you to make a valuable
contribution to the welfare of your
community, yes and to life as a
whole. That being true in your work
we are now doing, and in the place
where we are now living, we can each
carry out God's plan for our life.

"Let me but do my work from day
to day

In field or forest at the desk or
loom;

In roaring market place or tran-
quil room.

Let me but find it in my heart to
say

When vagrant wishes beckon me
away,

This is my work; my blessing,
not my doom."

SOME TWIST

Smith's symptoms were alarming
enough to take him to a doctor for
a checkup. Having fortified himself
at a tavern, he went through the
examination and awaited the report
in the reception room. When the
doctor appeared, Smith asked eagerly:
"What does the report show, Doc?"

Doctor: "According to this analysis
there is every indication that a small
percentage of blood is getting into
your alcohol system."

Time is running short and the gas is on its

Also those getting their work done now
will pay less than those that wait.

There is a steel industry strike on and that

NEUFELD — HIEBERT

Bouquets of flowers formed a background at the altar of the Evangelical Free Church, Brooks, on Friday, July 13, when Miss Erna Marie Hiebert, daughter of Mrs. Helen Hiebert, Brooks, became the bride of Mr. Kenneth Mervin Neufeld, son of Mr. and Mrs. A. U. Neufeld of Didsbury. The double-ring ceremony was performed by Rev. Don Taylor of Didsbury.

The bride, given in marriage by her mother, wore a floor-length gown of nylon tulle over satin, featuring a fitted lace bodice with full pointed peplum, peter-pan collar and lily-point sleeves. Her finger-tip veil was held in place by a coronet of sequins and pearls, her only jewellery being pearl earrings, and she carried an arm spray of American Beauty roses.

The maid of honor was Miss Olga Wiebe, who chose a floor-length gown of blue nylon lace and tulle over taffeta, with a lace bolero and a shoulder-length veil held in place by a matching flower head-dress. The bridesmaid, Miss Leonie Hiebert, sister of the bride, chose a matching gown of coral and they both carried arm-sprays of yellow carnations.

Best man was Mr. Laverne Neufeld, brother of the groom and Mr. Wayne Shantz and Mr. Ken Traub of Didsbury acted as ushers. Mrs. Don Taylor, at the piano, played a 15-minute prelude and the wedding music. Mr. Ormond Sherrick sang "Wedding Prayer" during the signing of the register.

Following the ceremony a reception was held for 100 guests in the United church basement.

Toast to the bride was proposed by Pastor Loge, responded to by the groom.

For the honeymoon trip the couple chose matching suits of charcoal flecked with pink and blue. The bride chose pink accessories. The honeymoon was spent at Waterton Lake and points in the U.S. The happy couple will make their home at Vancouver, B.C.

Many Visits Made By Health Unit Research Council

At a meeting of the Board of the Mountain View Health Unit held at the main office in Calgary on June 26, Mr. E. Miller of Olds was elected Chairman and Mr. F. Evans was elected as Sec.-Treasurer.

It was decided to change the name of the Unit to "MOUNT VIEW HEALTH UNIT" in order to avoid confusion with municipal district of Mountain View. The approval of the Minister has been requested for the change of name.

There were no staff changes during the quarter but some student nurses were attached to the Unit for field work.

School Health Services
There were 175 visits to schools for immunizations and 54 visits for examinations. An analysis of the defects show that there were 282 vision defects and 94 dental defects found during these visits. These two topped the list of defects. 1,083 children were examined and out of these 404 had some defect.

163 children were examined by the Medical Officer and his calculations of defects is as follows:

Teeth, 77; Tonsils, 25; Physique, 13; Heart, 7; Ears, 7; other, 14.

There were 30 children without observable defect.

Child Welfare
At the 68 clinics held, 1,853 children attended.

Out of a total of 18 cases of communicable diseases reported, 11 were Rubella, 6 were Red Measles and 1 was Whooping Cough.

There were 86 births and 38 deaths reported in the unit during the second quarter.

Sanitation
During the early part of the Sanitary Inspector transferred from Bow Valley Health Unit was, in the main, occupied in cleaning up work in the area, preparatory to handing over part of the territory to Drumheller and Medicine Hat Health Units. Lately, his time has been chiefly devoted to familiarizing himself with the whole of this unit. His contribution to the field work was confined to Belseker and that part of Bow Valley Health Unit absorbed by this Unit.

LIAR'S CLUB ENTRY

"Horses!" said the Yankee to the Texan. "Guess you can't talk to me about horses. I once had an old mare that licked the fastest express train on a 40-mile run."

"That's nothing!" said the Texan. "I was out about 50 miles from my ranch house one day when a frightful storm came up. I turned the pony's head for home and do you know, he raced that storm so close for the last ten miles that I didn't feed a drop, while my dog, only ten yards behind, had to swim the whole distance."

The bit of fun contest conducted by Mrs. J. Johnston was won by a visitor Mrs. Stark.

Since the county fair proved so successful last year, a similar one is being planned for Friday, August 17th at the community centre. The entry list contains home baking, buns, cakes, and bread, canned vegetables, jam and fruit, a complete list of fresh vegetables and flowers and special classes for the youngsters. A Message From SPREEMAN'S —

Our slogan has always been "a better job quicker!" At times I have been hard put to keep up with the "quicker" part, having to turn work away or do it some time later. Now, however, there are two of us again and we will do our best to live up to the whole slogan.

DO YOU NEED A FARM TRUCK HOIST?

We're handling some really good ones and you are invited to come in and talk it over — not a War Surplus or home-made hoist, but a precision-built job.

A plane was flying among the clouds at the height of the storm. It was thought by some it may be seeding the clouds as part of the hail suppression plan but such was not the case. IN MEMORIAM

In loving memory of a beloved husband and father, Garnet S. Tighe, who passed away August 8, 1964.

They say time heals all sorrows and helps us to forget.

But time so far has only proved How much we miss him yet.

God gave me strength to take it, And courage to heart the blow.

But what it meant to lose him No one will ever know.

Sadly missed by his wife and Family 11c
